

Organics – Decorative Acoustic Cork

Operation & Maintenance Manual

www.creatif.org.uk

02_Contents

Thank you for choosing Organics, acoustic cork tiles from Creatif.

As a Class D absorber, each Organics tile effectively soaks up unwanted noise from the space its installed in.

Thanks to their irregular patterns, the tiles help to break up sound waves, further enhancing acoustic comfort.

All Organics tiles are made from sustainably harvested, recycled cork and are coloured using a mass pigmentation process.

For technical drawings, please contact Creatif.

Servicing

Do you have a problem with your Organics tiles, other acoustic issues or want to ask a question?

Email: service@creatif.org.uk

Guarantees

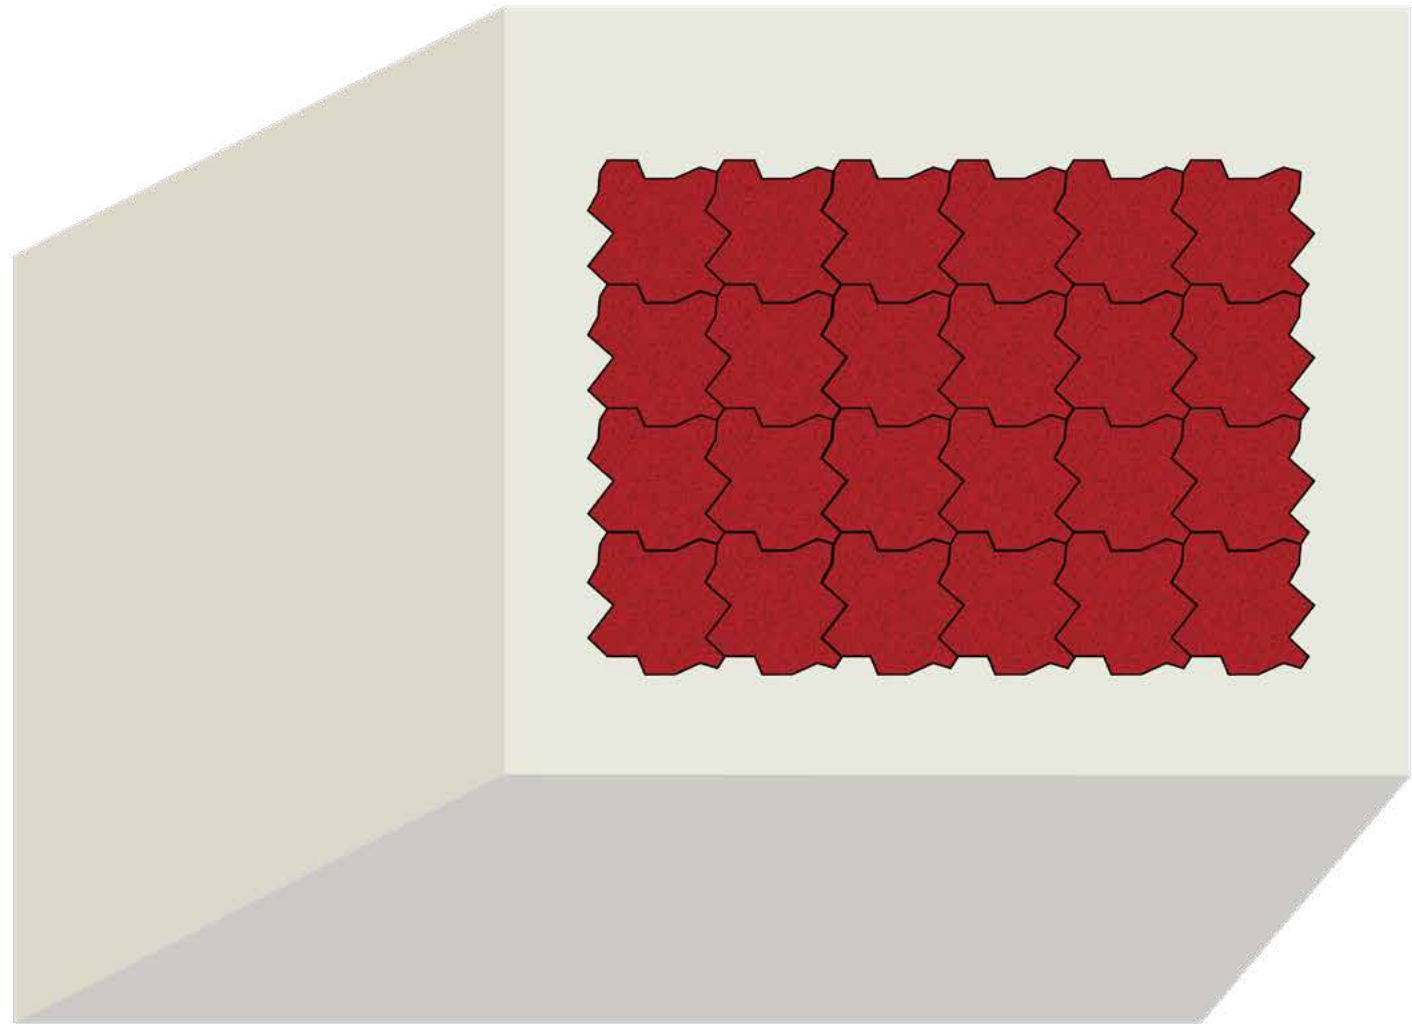

All materials are guaranteed for 12 months from the date of installation, with the exception of damage caused as a result of misuse or neglect.

03_Operation Guide

Once installed, Organics tiles don't require any special guidelines or instructions for use.

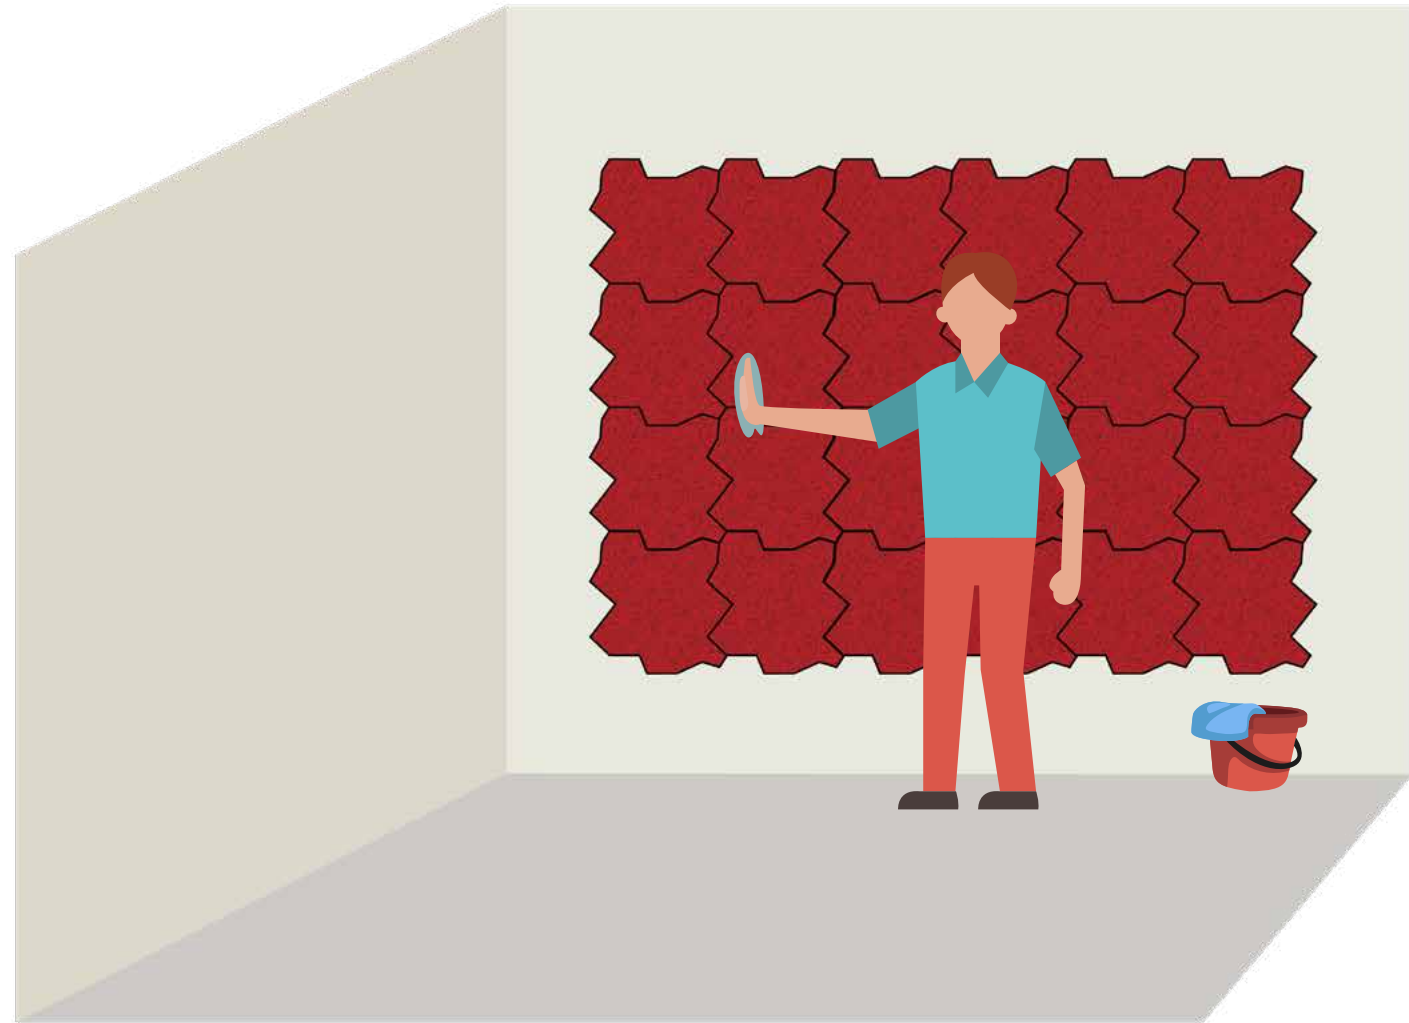

As they are fixed to the wall with adhesive spray, do not place any unnecessary or undue stress or pressure upon the tiles as this may cause them to come loose.

04_Maintenance

We recommend that you dust your Organics tiles on a regular basis to avoid the build-up of dust, dirt and other particles.

To remove stubborn dirt marks or stains, first use a damp cloth to clean the affected area and then wipe down with a dry cloth.
